Newark Town Hall

One of the finest town halls in the country, it was designed in Palladian style in 1774 by the eminent architect John Carr of York.

Rooms within the working Town Hall form part of the museum and house a fine collection of civic treasures. Visitors can see the imposing Council Chamber, Mayor's Parlour, and elegant Assembly Room, which was restored in 1990 to its former 18th century splendour.

The beautifully proportioned 18th century Assembly Room with magnificent Corinthian columns

Art Gallery

On the second floor is a delightful gallery overlooking the historic Market Place. The fine art collection includes works by William Nicholson, Stanley Spencer, and notable local artists, such as Robert Kiddey.

Spotlight Gallery

An ideal space for artists and local community groups to exhibit works. Temporary exhibitions change monthly.
